## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6-8 and 10-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Hoelle *et al.* (USPN 3,222,181) (“Hoelle”).

Hoelle teaches the use of spent hops residue that remain after the separation of solvent which contains tannin material and other plant products, such as celluloses, pectin, albumin, organic, etc. (Col. 4, line 55 to col. 5, line 4). These products are recovered using a hot water extract, which is then evaporated and the tannins, etc. are recovered and possibly concentrated (col. 6, lines 21-45). While Hoelle goes on to advantageously add the recovered hop products to the hop principles, i.e., acids, the intermediate product anticipates the claimed products. With regard to the rejected process claims, because they do not exclude the addition of other ingredients, these claims are also anticipated. With regard to claims that recited the use of specific solvents, these are process limitations that are given no weight, as the prior art product is the same as that which would be obtained using the claimed solvents.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hoelle.

Hoelle teaches that cited above, including the concentration of the intermediate hop product, but does not teach that the product is dried. It is notoriously well known that perishable products are dried to enhance shelf life and therefore it would have been obvious to those of ordinary skill in the art to dry the hop residue extract of Hoelle.

#### *Allowable Subject Matter*

Claims 1-5 are allowed.
